

PROBLEM: HIGH COSTS, HIGH EMISSIONS, UNDISTRIBUTED

The energy market is huge and growing. While the massive shift to electric transport and explosive consumption by mining and others – 85% of total electricity is still produced from fossil fuels with tremendous emissions and high costs. The solar and wind plants have been growing, but due to government support only, now slowing down. Batteries are cost-intensive and still lack density, putting high limitations on shifting to wind/solar energy and electric transport.

SOLUTION: LOW COSTS, NO EMISSIONS, DISTRIBUTED

Output Power: 5 kWh / 10 kWh / 100 kWh

Can be installed at home, in production, in vehicles

No refuel or maintenance needed within 1 year

97% lower costs compared to natural gas

Safe, eco-friendly, and renewable source

A Power Station with a capsule inside. The capsule contains an “active material”, consisting of titanium (a metal), saturated with deuterium (heavy water) under specific conditions. The technology is based on interactions between atoms of deuterium inside the titanium lattice when being heated to 560°C. As a result we get excessive thermal energy which is then effectively transformed into electricity – stand-alone, personal and cheap.
29 years of research, 2 patents and 62 successful tests since 2012.

PRIVATE TOKEN SALE

1 DNM Token = 1 MWh

Price: 2.95 USD

Target: 50 USD

Soft Cap: 500,000 USD

Hard Cap: 1,327,500 USD

Period: April 2 – April 27

| The Token price is set in US dollars. We accept ETH and cash. Details at www.deneum.com

| Calculated as a 30% discount of average electricity price in Europe (72 USD).

| The level upon which the stage will be considered successful

| The level upon which the stage will be closed

| The stage ends on April 27th or once the Hard Cap is reached, whichever comes first

KEY PERSONS

Dmitry Samoylovskikh
CEO

Forbes 30 under 30,
Founder of Tesla Amazing

Sergey Tsvetkov
Technology

29 years in nuclear physics
research, multiple articles

Sergey Godin
Research

Expert in electronics and
experimental setups.

Artem Lukashin
Investments

12 years in asset management at
Troika Dialog, Renaissance.
